What We Bring to the Table

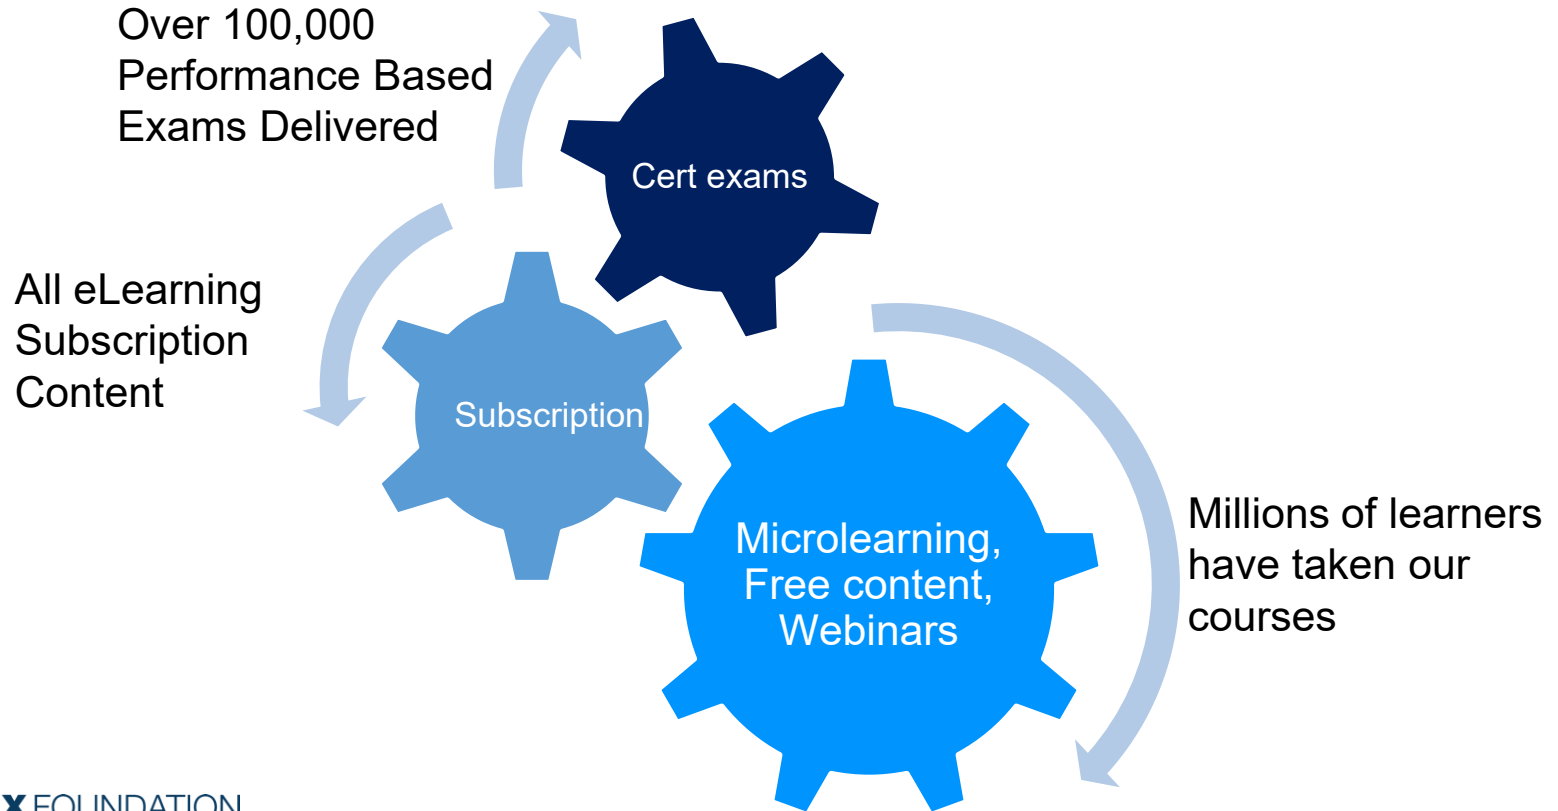

LF Education Team Provides

- Overall Project Management
- Instructional Design
- Psychometrics
- Content assembly
- Access to email lists
- Marketing
- Exam development process
- Experience working with SMEs
- Helpdesk support team
- eCommerce capabilities
- Online course/exam delivery platform

Project Provides

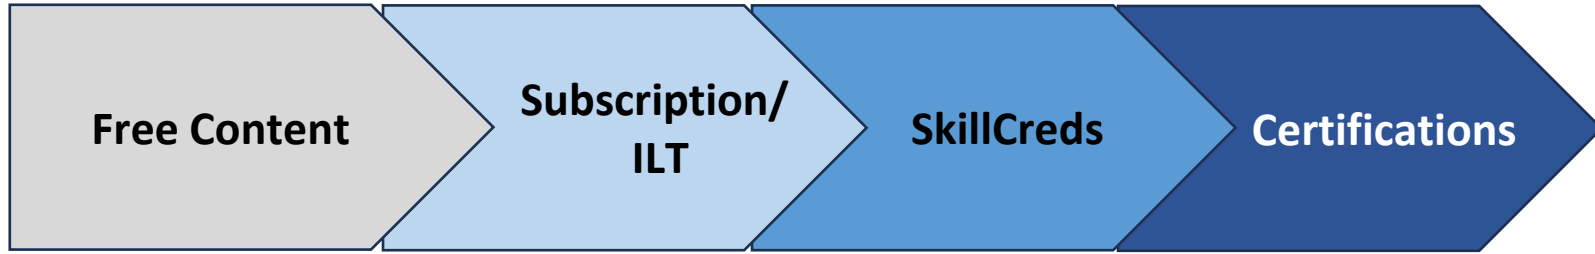

- Subject Matter Experts (SMEs)
- Product decisions (what topics)
- Marketing support
- Instructors (if applicable)

3 Key Components of The LF Education “Gear Box”

Internal Draft

Product Mapping Flowchart

Typical Conditions

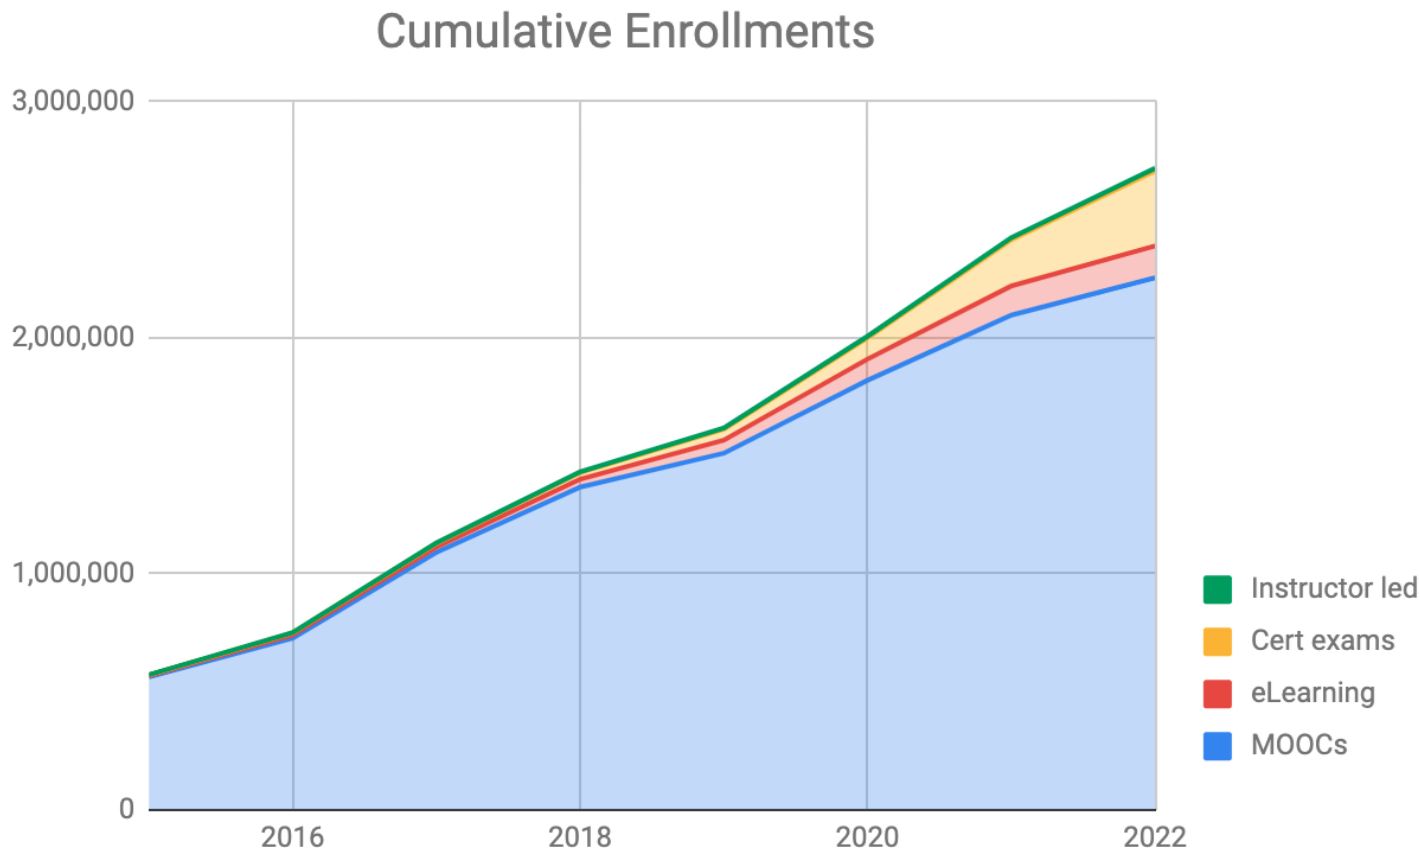

- New/recently graduated project
- Little/no evidence of ability/willingness to pay
- Little/no data on size of target audience and projected growth

- Multiple large user companies have created internal training courses
- ILT (LF or parter) training programs are cropping up at premium prices

- Large, growing end user group
- Skill is important but not core/broad enough to show up on job descriptions

- Technology is foundational and game changing (e.g. Linux, Kubernetes)
- Experience is widely cited in job descriptions
- Board member companies are willing to commit to purchasing (cumulatively) several thousand exams per year

Where to Start: 2.5M+ Reasons to Invest in Free Content

Internal Draft

Microlearning

- Short courses, videos, demos, tutorials, case studies, infographics
- Weeks from idea to finished product
- LF Ed Instructional Design team can convert from high quality content
 - Blog posts, existing videos, white papers, etc.
- Zero cost to the project (other than external SME if needed)
- Project identifies the Subject Matter Expert (SME) to work with Education team
- Metrics to see if the community is interested in material

eLearning Course

- Length matches content
 - Express learning ~ about an hour
 - Longer form course as needed. Linux Intro is 65 hours
- Months from idea to finished product
- Zero cost to the project (other than external SME if needed)
- Project identifies the Subject Matter Experts (SMEs)
- Determine job skills and competencies to cover. 50% content, 50% lab preferred.
- Typically no revenue to project - part of subscription typically

Instructor-Led Course

- One-day workshop to four-day course.
 - 50% content to 50% lab. More lab is better.
- Months from idea to finished product. One day Workshop may be weeks
- Zero cost to the project (other than external SME if needed)
- Project identifies the Subject Matter Experts (SMEs)
- Project helps find contract instructors
- Revenue share with project
- Can create eLearning course from ILT course if desired

SkillCred

- Focus on single skill or task, like using Vim or the Bash shell, all levels of experience
- Weeks from idea to finished product
- Work with certification team - job task analysis, community input, psychometrician
- Zero cost to the project (other than external SME if needed)
- Digital badge for display on online profiles, enhancing professional visibility and credibility
- Some revenue share to project. Retail is \$79-\$99
- Exams take less than 45 minutes
- Credential doesn't expire

Multiple Choice Associate Exam

- Beginners in IT, career changers, or anyone seeking a pre-professional credential to build toward advanced certifications
- 90-minute multiple-choice exam (beginner level); costs \$250 for the exam alone, or bundled with courses/subscriptions up to \$495; one retake included; 12 months to schedule.
- Typically zero or low cost to the project (other than external SME if needed)
- Project identifies the Subject Matter Experts (SMEs) - we will also search community
- Work with certification team - job task analysis, community input, psychometrician
- Some revenue to the Project. \$445 Retail for exam, includes retake
- Months to create

Practical Certification Exam

- Complicated process to create
- 9-12 months from idea to finished product
- LF Ed Instructional Design team can convert from high quality content
 - Blog posts, existing videos, white papers, etc.
- May be cost to the project
- Project identifies the Subject Matter Expert (SME) to work with Training team
